

# The HoneyTone Mini Amp

When using a HoneyTone Mini Amp with headphones, you can hear your Dulcimer even when several others are playing. It costs about \$30, and can be purchased at The Guitar Center or Amazon. They are 5" tall, 5" wide, and 2 ½" thick. I rarely plug mine in, as it runs for weeks straight on the 9V Battery (included).

**Using one is easy!  
Here's \*all you need:**

HoneyTone Mini Amp  
"Pickup" Mic (\$10 and up)  
Headphones (with jack, NOT wireless)

**Connect as shown.**

**Left:** Plug the Pickup into the "IN" port on the top, then moisten the suction cup and attach to underside of Dulcimer.

**Below:** Plug the Headphones into the "HEADPHONES" jack on the side of the AMP.

**To Use:** Connect everything, then place Amp where it's not a trip hazard. Put on the headphones, turn the Amp ON and adjust Volume, Tone, and Drive.

**Shown above:**

**PICKUP** -- AXL Acoustic Guitar Transducer Pickup with 1/4 Jack and 9 Foot Cable (Amazon, \$11.25)

**HEADPHONES** - old pair found around the house

- *I keep everything zipped up in a black Man's Travel/Shaving tote, where I also keep an extra battery.*
